

VIDEO SCRIPTING FOR COURSE MATERIAL PRESENTED ABOVE
Applying Outline Version 1.04 – September 2016

Prepared by Doug Trovinger, MBA, Ed.S.

Module 1
Part 1 – Course Objectives

<i>Slide Number</i>	<i>Scripting That Applies To PowerPoint Slide (Draft Mode)</i>
<p>P1 – 001 Course Objectives</p>	<p>PowerPoint Contents:</p> <p><i>Upon completion of the course, learners will be able to:</i></p> <ul style="list-style-type: none"> • <i>Define what an active shooter is and why it's important to be aware of potential situations</i> • <i>Understand various healthcare risk factors that can compromise safety</i> • <i>Learn best practices on how to plan, prepare, and help avoid an Active Shooter Incident</i> • <i>Grasp and understanding of the 'Run, Hide, Fight' protocol during an ASI</i> • <i>Apply behaviors that should be expressed in a Post-ASI environment</i> <p>Video Scripting Contents</p> <p>Course objectives. Upon completion of the course, learners will be able to define what an active shooter is and why it is important to be aware than an active shooter incident (or ASI) may occur at a healthcare facility. Second, understanding various healthcare risk factors that can compromise safety of patients and staff is the next topic on the list. Applying these as well as other background information on ASI's mentioned early on lead us to our third objective of planning and preparing for ASI's. Having plans in place are critical to be prepared if an incident should occur In the event an ASI does take place, the fourth objective of the course is to grasp a good understanding of the 'Run, Hide, and Fight' protocol while it is in progress. To close out the course, specific behaviors will be recommended for one to use once an ASI is under control or has been successfully terminated.</p>
<p>P1 – 002 Course Disclaimer</p> <hr/> <p>End of Part 1</p>	<p>PowerPoint Contents:</p> <p><i>While the course will cover a number of concepts, terms, and topics, it is important to note the following:</i></p> <ul style="list-style-type: none"> • <i>Course is in no way a substitute to an Emergency Action Plan</i> <ul style="list-style-type: none"> • <i>Rather, materials provided can be used all or in part to integrate into an existing/ new EAP</i> • <i>Specificity of information and its applicable use</i> • <i>Safety of persons on property (regardless of whom it may be) is top priority at all times</i> <p>Video Scripting Contents</p> <p>While the course will cover a number of concepts, terms, and topics, it is important to note the following important disclaimers. First and foremost, the course is designed in a way that it should never be looked at as a substitute to your sites specific Emergency Action Plan (or EAP). Rather, information that is derived from the course can be interwoven into an EAP for an ASI that may take place. Next, information that is provided is tailored for the Healthcare industry and medical facilities. Finally, and above anything else, the safety of all persons that may be on property – patients, visitors, staff, and doctors to name a few, is top priority.</p> <p>As mentioned before, the main goal of this course is to provide more than sufficient levels of information to prepare and plan for ASI's. In the next section, we will go over core concepts of ASI's. Please continue on to Part 2 – Key Concepts of Active Shooter Incidents.</p>
